1st Announcement

Welcome

Congress Honorary President

Prof. Ahmed Okasha

Founder of Institute of Psychiatry - Ain Shams University, Cairo.
President Egyptian Psychiatric Association.
President World Psychiatric Association (2002 - 2005)

The Egyptian Psychiatric Association promotes Early Career Psychiatrists who we believe that they are the future of psychiatric progress. Their potentials and enthusiasm will be a key factor to establish their ambitions. Our objectives in teaching psychiatry should be directed towards attitude, knowledge and skills. Thus, we should promote training of Early Career Psychiatrists to empower them with necessary clinical skills and attitudes for a better mental health service. In 2010 we established a section for them to address their needs and ensure high quality training for all Early Career Psychiatrists in Egypt. To our knowledge, this is the first Early Career Psychiatrists congress in the world. It will be held in Cairo, Egypt known for its heritage in culture, science and arts. It will be a great chance for Early Career Psychiatrists from all over the world to meet, exchange experiences and establish new connections and friendships. Hopefully, those connections will be the nucleus that will maintain the development of psychiatric researches and services worldwide through those generations.

I welcome you all for a fruitful scientific and an enriching social event. Welcome to Egypt.

Congress President

Prof. Tarek Molokhia

Head of Early Career Psychiatrists Section
Egyptian Psychiatric Association

As the head of the Early Career Psychiatrists section, I am very proud of having this great event organized in Cairo. During the last two years, the enthusiastic early career psychiatrists in Egypt have proven to be very active. We have organized workshops, training courses, had activities in several national congresses, and in the WPA regional meeting. We sincerely aim at providing high quality training that meets the needs of early career psychiatrists.

Having this congress will be a great opportunity to start an international network among the Egyptian early career psychiatrists and their international colleagues.

I welcome you to Egypt, and truly wish you a successful and fruitful congress.
